EDUCATION

University of California, Berkeley | *Class of 2028* **Berkeley, CA**

- **Major:** Computer Science, Data Science, and Music *3.52 / 4.00 GPA*
- **Relevant Coursework:** Computational Programming, Discrete Math and Probability, Data Structures and Algorithms, Foundations of Data Science, Linear Algebra and Differential Equations, Internet Architecture, Artificial Intelligence

SKILLS

Languages / Web Dev: Java, Python, Javascript, Typescript, SQL, HTML, CSS, React, Node.js, GraphQL, MongoDB
Data Science & AI: Pandas, NumPy, Scikit-Learn, Matplotlib, Seaborn
Tools: Git/Github, Amazon Web Services, Docker, Linux/Bash, Google Apps Manager, Atlassian Suite

WORK EXPERIENCE

Berkeleytime **Aug 2025 – Present**
User Relations Lead *Berkeley, CA*

- Engineered frontend and backend features for Berkeley's course-scheduling platform serving 45,000+ active students
- Resolved critical UI bugs and optimized frontend components, improving site usability and load times for high-volume course registration periods; conducted user research for a feature allowing students to plan their four-year schedules
- Lead a team of five in executing marketing strategies to drive campus-wide platform adoption and student engagement

International Computer Science Institute **Sept 2026 – Present**
IT Intern *Berkeley, CA*

- Handled Identity and Access Management (IAM) protocols and enforced two-factor authentication across Google Workspace, securing infrastructure and mitigating account vulnerabilities using Google Apps Manager (GAM)
- Detailed and organized documentation in Confluence for policies, procedures, security, risk management, infrastructure, etc.
- Researched API integration in Cayuse to increase efficiency of communication between HR, SPO, and Accounting/Finance

Memori Labs AI **May 2026 – Sept 2026**
Student Ambassador *San Francisco, CA*

- Spearheaded product adoption for an LLM memory integration tool, implementing structured memory for AI agents
- Introduced short-form content to increase views & reach by 25% for our product across six social media channels
- Capitalized on current social media trends and topics in the AI space; grew our community by over 400+ users in 3 months

Southland Polymers Inc. **May 2024 – Jul 2024**
Business & IT Intern *Santa Fe Springs, CA*

- Proposed AI integration to optimize prospecting efforts by 20%, including email outreach and client generation
- Improved the Product Line Card design for potential customers and updated important documents on company website
- Enhanced operational efficiency for HR department by digitizing credit card applications and travel request forms

North Carolina State University **Jun 2023 – Aug 2023**
Educational Software Development Intern *Raleigh, NC*

- Developed educational games in *Snap!* and created detailed guides for both teachers and students for each lesson
- Led and designed 6 distinct projects over 6 weeks, contributing 20 hours per week remotely to ensure quality of lessons
- Collaborated daily with advisors and team members to discuss and refine the weekly educational project focus

PROJECTS

Nat One | *AI Dungeons Master for Dungeons & Dragons* **CalHacks 2025**

- Engineered a voice-interactive AI Dungeon Master, integrating the Lava API for LLM-driven narrative generation and Fish Audio API for real-time text-to-speech transcription

NeuroStigma | *Data Visualization of Mental Health Within Minorities* **Kode with Klossy 2023**

- Developed a data visualization web application to highlight mental health disparities; utilized Pandas and Matplotlib to clean demographic datasets and render interactive multi-line charts

LEADERSHIP

Computer Science Kickstart | *Family Leader* **Aug 2026 – Present**

- Led a one-week orientation program for incoming women in computer science, introducing them to CS topics
- Continue to maintain mentoring relationships with each individual, helping acclimate them to campus and offering advice
